Krasheninnikova, N. L.
ON THE UNSTEADY MOTION OF GAS DISPLACED BY A PISTON. [1963] 20p (figs. formulae omitted) 4refs
Order from OTS or SLA $1.60 63-20282

Trans. of [Akademiya Nauk SSSR. Otdelenie Tekhnicheskikh Nauk]. Izvestiya, 1955, no. 8, p. 22-36.

DESCRIPTORS: *Gas flow, *Pistons, *Detonations, Shock waves, Equations of motion, Velocity, Reynolds number, Pressure, Mathematical analysis.

The present paper attempts the solution of the problem involved in a strong detonation, taking into account the explusion of air by the products of the detonation. The basic assumption consists in the following: the motion of the gaseous masses is given shape by the expansion of the sphere (a spherical piston), the radius of which grows in accordance with the law $Ct^{n+1/(n+1)}$, where C and n are constants.
